# Practical experience Sailplanes and Powered Sailplanes, cat. L1 and L2

# Contents:

Section 1 Personal Data plus indication Category.

Section 2 Details Supervisors.

Section 3 Experience details.

Section 4 Details Quality Manager.

Section 5 Instructions filling in logbook.

Section 6 Logbook pages.

This logbook is to be used to record details of experience on Group 4 Aircraft and is based on AMC/GM Part-66 Appendix II, B). The experience should cover tasks from each paragraph of the Appendix II list. Other tasks than those in the Appendix II may be considered as a replacement when they are relevant. This logbook can be used for the initial application, extension with another subcategory or the removal of a limitation (from conversion), within the L category

#### Please indicate for which category this Logbook is being used:

L1C:Composite sailplanesL2C:Composite powered sailplanes and composite ELA1 aeroplanesL1:SailplanesL2:Powered sailplanes and ELA1 aeroplanes

|                          |                 |                           |                              |

\* In case the Supervisor/CS is not in possession of a Dutch registered Part-66AML a copy of the foreign AML needs to be attached.

If more than one page is needed, please print out this page as much as required.

\*\* If signed by Quality Manager, please provide copy of relevant MOE page which states his/her position (no copies of AML/Company licenses of the supervisors required).

#### 3.1. Aircraft Constructions Experience

For the category L please indicate on which type of aircraft construction the experience requirements are met:

| Check* | Construction Type                  | Aircraft type (1) | Aircraft type (2) | Aircraft type (3) | Aircraft type (4) |
|--------|------------------------------------|-------------------|-------------------|-------------------|-------------------|
|        | Metal aeroplanes                   |                   |                   |                   |                   |
|        | Composite structure aeroplanes     |                   |                   |                   |                   |
|        | Wooden structure aeroplanes        |                   |                   |                   |                   |
|        | Metal tubing and fabric aeroplanes |                   |                   |                   |                   |

#### 3.1. Duration Experience:

Indicate in which period the experience is achieved ".

| Start date | End date | Company | Total Duration |
|------------|----------|---------|----------------|
|            |          |         |                |
|            |          |         |                |
|            |          |         |                |
|            |          |         |                |

#### Note:

Check the appropriate box in reference to the experience met.

#### 4. Details Quality Manager/Supervisor(s)/AML holder

By signing this logbook, the <u>Quality Manager/Supervisor(s)/AML holder</u> will ensure that the technician has sufficiently satisfied the basic experience requirements (ref. Part 66.A.30 basic experience requirements).

Experience requirements for the category L.

- (a) 2 years of practical maintenance experience in operating aircraft covering a representative cross section of maintenance activities in the corresponding subcategory;
- (b) as a derogation from point (a), 1 year of practical maintenance experience in operating aircraft covering a representative cross section of maintenance activities in the corresponding subcategory, subject to the introduction of the limitation provided for in point 66.A.45(h)(ii)(3).

For the inclusion of an additional subcategory in an existing L license, the experience required by points (a) and (b) shall be 12 and 6 months respectively.

Name: Location: Company: Date: Signature:

#### 5. Instruction logbook practical experience.

Pages six (6) of this logbook is based on Part 66 AMC appendix II "Aircraft Type practical Experience and On the Job Training", B) and the performance of practical activities as mentioned in Modules 4L, 5L and 6L. There is a maximum flexibility for adding tasks in this logbook.

The practical experience should cover a representative cross section including at least:

For category L:

In the subcategories L1, L1C, L2 or L2C 50% of the tasks contained in Appendix II to the AMC relevant to the license category and to the applicable aircraft type ratings or aircraft (sub) group ratings being endorsed.

All tasks listed need to be performed, including the ones marked with an "X", unless as otherwise indicated (depending on the category).

Removal of limitations:

- For removal of the limitation "Excluding ELA1 Aeroplanes" perform the tasks marked with an "X".
- For removal of the limitation "Excluding electric powerplants" perform the tasks mentioned under electrical propulsion.
- For the removal of the limitation "Excluding turbine powerplants" perform the tasks mentioned under jet propulsion.
- For removal of the limitation "Excluding Engines/Engine instruments" perform the tasks mentioned under propeller, piston engines, fuel and control, ignition systems, engine indicating and exhaust.
- For removal of the limitation "Excluding structure and mechanical systems" perform the tasks mentioned under wooden structure/metal tubes and fabric, composite structures, metal structures.

This Logbook consist out 7 columns. All the columns needs to be completely filled.

In column 1: ELA 1 removal (marked with X) In column 2: Task title In column 3: Aircraft type/construction In column 4: Job/Work order number (if applicable) In column 5: Aircraft Registration In column 6: Signature of supervisor In column 7: Date task performed

| 1                              | Example: 2                                       | 3                           | 4                     | 5                    | 6                        | 7                    |
